

## ANIMAL CAPTURE FORM

Date:

Animal number:

Name of responsible researcher (s):

Name of veterinary helper:

Purpose of capture:

Location of capture:

Ambient temperature:

Weather conditions:

Species: Harbour seal

Time captured in net:

Time on land:

Sex:                                      male                                      female

Estimated age:                      adult                      juvenile                      pup

Animal condition (circle):        excellent                      good                      fair                      poor

Animal body weigh:

Type of restraint during marking:                      Chemical                                      Physical

Behavior/stress level prior to sedation / anaesthesia:

| Drug | Dose | Adm route | Time administered | Time to onset effect | Degree of sedation / anesthesia |
|------|------|-----------|-------------------|----------------------|---------------------------------|
|      |      |           |                   |                      |                                 |
|      |      |           |                   |                      |                                 |
|      |      |           |                   |                      |                                 |
|      |      |           |                   |                      |                                 |

### Monitoring

| Time | Respiratory rate | Heart rate | SpO <sub>2</sub> | Temperature | Colour mucosa |
|------|------------------|------------|------------------|-------------|---------------|
|      |                  |            |                  |             |               |
|      |                  |            |                  |             |               |
|      |                  |            |                  |             |               |
|      |                  |            |                  |             |               |

Intubated:        yes        no

Time initiated:

Time ended:

Injuries or abnormalities noted:

Samples taken:

Time animal recovered:

Time animal released:

Telemetry device and rototag number:

Comments:
